

OpenRat is a free Content-Management-System. Learn more [about Openrat](#) or try a [download](#).

## Switching to Mercurial

CVS was replaced by the Mercurial DVCS. Now you are able to checkout the latest version with `hg clone static-http://scm.openrat.de/latest`.

## Latest Release

OpenRat is available at [dl.openrat.de](http://dl.openrat.de). Download the file [openrat-latest-snapshot](#) for the latest version.

There is an [debian](#) package available. Append

```
deb http://debian.openrat.de/latest ./
```

to your `/etc/apt/sources.list`. An `apt-get install openrat` installs OpenRat.

## Sources

- OpenRat ist Open Source. You may get the sources via [Mercurial](#) with the command `hg clone static-http://scm.openrat.de/latest`.
- Have a look at the [changelog](#).

## Support for Open-Id

OpenRat supports Authorization with [Open-Id](#). OpenId ist disabled by default, but it is easily activated by a configuration setting in file `security.ini.php`.

## Forum and bugtracker

- [Support forum](#)
- [Bugtracking](#)

## WebDAV

OpenRat supports webDAV.

## HTML-Editor

OpenRat includes the [CK-Editor](#).

## Demo

A [demo of OpenRat CMS](#) is available, please login with "admin" and "admin".
